WEB DEVELOPER | APPLIED AI & AUTOMATION | REMOTE

PROFILE

Engineering student at INBTP and web developer based in Kinshasa. Hands-on project work includes responsive websites, application prototypes, APIs and automation flows using JavaScript/TypeScript, React/Next.js, NestJS/PostgreSQL and n8n. Seeking entry-level remote opportunities in AI data annotation, model evaluation or quality assurance.

TECHNICAL SKILLS

- **Web development** : HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS, responsive UI/UX and accessible CSS/JavaScript animation.
- **Back-end & data** : Node.js, NestJS, PHP, SQL, PostgreSQL, Prisma, Supabase, APIs, Render and Vercel deployments.
- **AI & automation** : Prompt engineering, AI-assisted development, Claude, Lovable, Replit, n8n, Docker Desktop and Node.js WhatsApp bots.
- **Quality & collaboration** : Git/GitHub, iterative prototyping, web accessibility, SEO and technical documentation in English.

SELECTED PROJECTS

Published academic-guidance website • web developer, FEMAF ONG (<https://femafong.com/>) June 2026

- Built and published responsive pages for services, study destinations, FAQ, contact and guidance requests using React, Vite and Tailwind CSS.

School-management prototype & API • demo data, Sukulu (<https://sukulu-web-kinshasa.onrender.com/>) 2026

- Prototyped student records, grades, attendance and USD/CDF tracking with a Next.js/PWA interface and a NestJS API using PostgreSQL/Prisma.

Restaurant website and ordering flow • ongoing, MacDo Mami (<https://dellyngoyi3-max.github.io/macdomami-version-2/>) 2026 – present

- Built a mobile-first journey with a filterable menu, cart, reservations, WhatsApp orders and a table-order flow using QR codes.

EDUCATION

INBTP

Kinshasa, DR Congo

Building Technology Engineering

In progress

- Preparatory year in engineering and technology: 2023–2024.

CERTIFICATION & LANGUAGES

- **Certification** : HP LIFE, “AI for Professionals”, 2026.
- **Languages** : French and Lingala (native); English (fluent); German (A1).
